We're launching on Nigeria's independence Day to celebrate Freedom, unity, and better healthcare access for all.

What we created

We designed six editions of HealthCentreApp – including two free editions to ensure everyone can use it, and affordable subscription editions for advanced digital health support.

GPSMedical Public Edition - For anyone, anywhere. Instantly find nearby medical services without registration.

GPSMedical Personal Edition - Your personal safety net. Includes automatic next-of-kin emergency alerts and Sponsored Ad creation.

Subscription Editions (from ₦6,000/year) - Unlock advanced features such as Digital Health Records, AI Medical Fact-Checkers, CareRequest, CareConnect with overseas consultants, CareSecure AI Diagnoser, RemoteCare, CareMonitor, Medication Tracker, Appointment Planner, plus a Community Edition to support citizens with low digital literacy.

Why we created it

To enable all people in any parts of the world to benefit from digital health and HealthCare AI and using GPS to connect Citizens to medical services especially in emergency and stop citizens dying needlessly.
